Portal Creatio overview

PRODUCTS: [ALL CREATIO PRODUCTS](#)

Creatio portal is a component that provides a way to open up various parts of your system to external users, such as customers, partners, contractors, stakeholders, or teams within your company.

A portal is a workplace with different permissions for various types of users. The portal UI is similar to the UI of the primary application. Use the portal to create a limited subset of Creatio with restricted access to data and only the necessary functionality. The list of sections available in Creatio portal depends on its configuration.

Through a portal, users can access certain Creatio sections and their associated data. Additionally, they can view, edit, or create records, as well as add notes and attachments.

The Creatio portal is provided in three configurations: self-service portal, customer portal, and partner portal. They are suitable for a variety of use cases, the most common being:

- **Customer self-service**, such as in technical support. Give a self-service option to your customers and focus the time and expertise of your support agents on more important tasks. Allow your customers to submit support cases and track the resolution progress directly on the portal. Provide them access to your knowledge base articles, helping them to find answers quickly. Service multiple customers at once, avoiding queues and productivity loss. [Read more >>>](#)
- **Interaction with internal and external customers**, for instance, an HR portal. Configure the ability to service external employees and contractors who do not use Creatio regularly: create applications, submit them for approval and track their progress. An HR portal can act as a central hub for all the important company documents and policies that are available freely. [Read more >>>](#)
- **Interaction with external users** (clients, dealers, and partners) at all stages of the sales process. Create partner programs, process leads, and close opportunities along with your partners by using lead and corporate sales management processes. Keep track of the partner tiers, training sessions, and the partners' certified experts. [Read more >>>](#)

In Creatio, the portal functionality is licensed separately.

The following licenses are required for each user of different portal editions:

- customer portal on-site/cloud for the customer portal
- self-service portal on-site/cloud for the self-service portal
- partner portal on-site/cloud for the partner portal

Learn more: [Creatio licensing](#).

Self-service portal

The self-service portal is available in Service Creatio customer center, Service Creatio, enterprise edition, and Financial Services Creatio, customer journey products. The portal can act as a primary means of user support or as an extension of your service system.

The self-service portal eases the load on your employees by freeing up various communication channels (e. g., phone or email) and routing incoming requests. On the self-service portal, users can find answers to their

questions in the knowledge base, create and track the progress of their support cases, or communicate with the support staff via the feed. Unlike support agents, self-service capabilities and information are available to your customers 24/7. The self-service portal configuration allows you to add the following sections to the portal:

- The [*Portal Cases*] section, where portal users can register support cases on their own, as well as track the case resolution progress and communicate with support employees. The [*Portal Cases*] section is a counterpart to the [*Cases*] section in the main Creatio application. You can choose which fields and details from the [*Cases*] section to display in the [*Portal Cases*] section via the Section Wizard.
- The [*Portal Knowledge base*] section, where portal users can look up the reference information, search for answers to frequently asked questions, find rules, regulations, document templates, or advertising materials.

You cannot add custom sections to the self-service portal. However, you can customize the base sections.

Customer portal

The customer portal configuration provides portal capabilities to all Creatio products and is designed for process automation, e. g., providing services, confirming applications and service requests, etc. You can add custom sections to the customer portal to automate any internal process. All custom logic in these sections will be available to the portal users. Configure business processes and cases on the portal to automate routine administrative tasks. For example, customer portal users can:

- Initiate processes, e. g., create applications, requests, etc.
- Participate in processes, e. g., approve requests.

You can add up to three custom sections to the customer portal. Configure the custom sections in the Section Wizard and add them to the “Portal” workplace to display them on the portal.

Create custom sections from scratch with no or minimal connection to base Creatio sections.

The customer portal configuration in Financial Services Creatio, customer journey edition allows you to add the [*Applications*] section to the portal. Additionally, you can add the [*Documents*] section if your Creatio product supports it.

Note. You can use the self-service and customer portals together to set up a support service channel with up to 3 custom sections.

Partner portal

The partner portal is available in Sales Creatio, enterprise edition, and Creatio CRM Bundle.

The partner portal is designed for companies that work with customers via partner networks. This portal is a platform for communication and collaboration on leads and sales with your partners.

A [partner](#) can work with your customers on your behalf using the partner portal.

Note. Add the partner organization to the “Partner portal users” functional role to let the organization access the “Partner portal” configuration. Learn more: [Manage users and access permissions on the portal](#).

Find the data about your company's partners and related partnerships, their conditions, and status in the [*Partnership*] section of the main application. This section is best suited for your employees in charge of partner interaction. You can use it to set up the cooperation conditions and add as many [partnerships](#) as needed, but no more than one per partner (Fig. 1). The partner portal displays the conditions of an individual partnership as a partner program.

Fig. 1 The [*Partnership*] section in the main application

Name	Active	Partner type	Level of partner	Owner	Due date
Gtech-2021	Yes	Reseller	Bronze	Peter Moore	8/16/2022
ClearSoft Systems-2021	Yes	Reseller	Bronze	John Best	1/7/2022
Feature IT-2021	Yes	Reseller	Platinum	Caleb Jones	8/16/2022

Manage the partner performance and set up the cooperation conditions in the main Creatio application.

The [*Partner program*] section will display the partnership conditions you configure in the main application. Partner portal users can view only the profile of their organization and cannot edit the data. Your partners and their employees can access the [*Partner program*] section. This section contains all information relevant to your partners and their work (Fig. 2):

- Current partner tier.
- Partner program conditions for the current tier, including the partner reward, such as a percentage of the partner's profits (profit margin) and performance indicators required for a level-up.
- Partner training sessions and certifications.
- Lead and opportunity analytics.

Fig. 2 A partner program page on the portal

The screenshot shows the Creatio portal interface for a partner named "ClearSoft Systems-2021". The interface includes a sidebar with navigation icons, a top header with the partner name and search bar, and a main content area with tabs for "GENERAL INFO", "MARKETING ACTIVITIES", "HISTORY", "OPPORTUNITIES AND LEADS", and "ATTACH". The "GENERAL INFO" tab is active, displaying various metrics and details.

Partner Information:

- Name: ClearSoft Systems-2021
- Partner type: Reseller
- Margin, percent: 10.00
- Start date: 1/8/2021
- Due date: 1/7/2022
- Active:

Key Metrics:

- Current level: 1
- Current point: 38
- Total sales: 100,000.00
- Marketing activities: 0
- Certified employees: 1

Education and certification: Is active

Analyst	Type	Payment method	Contact	Result	Event date
certificate	Certification	Paid	William Clarks	Passed	11/27/2020

Partnership parameters: Target

Parameter	Type	Kind	Current value
Leads number	Target	Obligation	10
Opportunity amount	Target	Obligation	100000.000

Funds: No data

You can only bind a single partner program to each partner.

When working on the partner portal, your partners can register new leads and opportunities in the corresponding portal sections. A partner program page displays lead and opportunity details by default. You can also find them on the partnership page in the primary application. This data is used to keep track of how partners fulfill their partnership conditions and how they progress through partnership tiers. Set up and view partner sales analytics in the dashboards on the portal main page. Learn more: [Channel sales](#).
