# [Predict data] process element

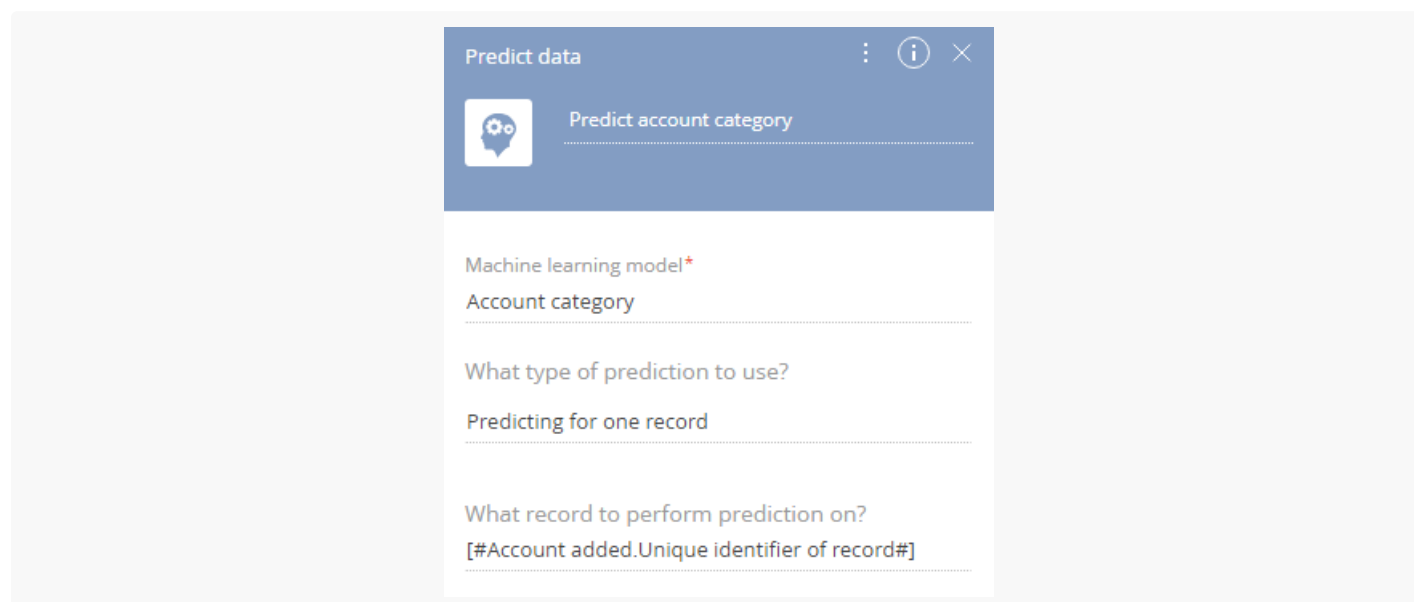

PRODUCTS: ALL CREATIO PRODUCTS

The [ *Predict data* ] process element uses trained machine learning (ML) models to predict data for records as part of a business process.

Specify a previously created ML model to predict data and select records for prediction.

**Note.** Prediction models have to be trained before they can be used in the business process. If the model is not trained, it will not be available for selection in the [ *Predict data* ] element. Read more: [AI tools](#).
