Add new element translations

PRODUCTS: **ALL CREATIO PRODUCTS**

Streamline Creatio customization by adding translations to UI elements, such as fields, field groups, details, and tabs, while setting up these elements in the Section Wizard. For example, here is how you can add the **field title** translation.

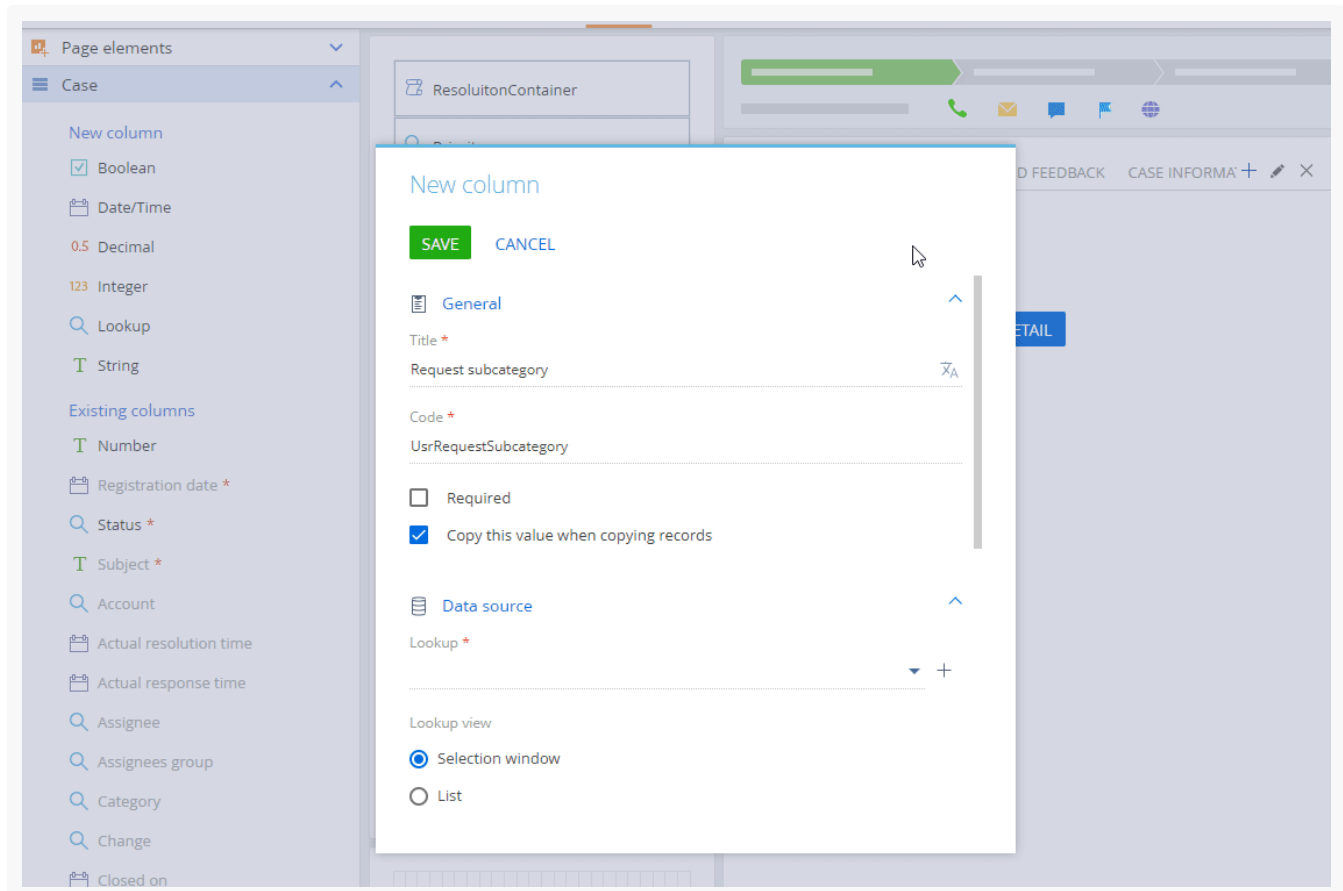

1. Open the relevant section, e. g., [*Requests*].
2. Click [*View*] → [*Open section wizard*].
3. In the “Section pages” block of the Section Wizard:
 - click [*Edit page*] if there is a single page in the section
 - click **the link to the relevant page** if there are several pages in the section.
4. Select a field you need to translate and click . If there is no such field, add it.
5. In the setup window:
 - a. Find the fields with the  button on the right. These usually are [*Title on page*] and [*Tooltip*] fields.
 - b. Click the button and add translations to every active Creatio language for each field (Fig. 1). Manage the list of the available UI languages in the [*Languages*] section. Read more: [Custom localization](#).

Fig. 1 Adding translations to the field title

Note. UI localization setup for the [*Pre-configured page*] business process element and the Detail wizard works in a similar way.

6. Click [Save].

Once you save the changes in the Section Wizard, users will see the field title in their Creatio language.
