Marketplace updates

This article contains a description of changes to the Marketplace that affect developers publishing apps. Official Marketplace website: [Creatio Marketplace](#).

Learn more about the development of Marketplace apps in the developer documentation: [Marketplace app development](#).

Update date: 10/15/2022

Marketplace app metadata

Instructions to set up the Marketplace app metadata were added. Add metadata for all published Marketplace apps to ensure they operate as intended on the latest Creatio version.

Since version 8.0.2, Creatio lets you store and configure app metadata to display in the Application Hub. You can add metadata to any Marketplace app. Learn more in the developer documentation: [Set up the Marketplace app metadata](#).

Update date: 09/01/2022

Marketplace app terms and conditions

We have begun an overhaul of the [*Terms & Conditions*] block. You can now add the link to the Marketplace app terms and conditions to the [*Terms & Conditions*] property of the Developer profile.

Use default Terms & Conditions

You can use your own terms and conditions in accordance with the law and policies of your company or use the standardized terms and conditions that Creatio Marketplace offers to streamline the procurement workflow. Learn more about the standardized Creatio terms and conditions a separate document: [License terms and conditions of the use of Applications and Templates placed on the Creatio Marketplace](#).

Terms and conditions help to ensure your Marketplace app complies with international and national legislation requirements.

Update date: 08/10/2022

Marketplace app localization

You can now specify one or more cultures in the Developer profile. We recommend specifying supported cultures for all your Marketplace apps. That way, users will know they can use their preferred localization.

Convert a Marketplace app package to an assembly package

If you use a Marketplace package developed for Creatio 8.0 Atlas and earlier, we recommend converting the simple package and project package to an assembly package. Learn more about assembly packages and package conversion in the developer documentation: [Assembly package](#), [Package conversion](#).
