

CREATING “SHOW MODAL WINDOW” PROCESS ITEM

Target audience: This guided learning is intended for Creatio platform developers who require practical programming process user task skills.

Expected results: This guided learning will help participants gain the skills necessary to develop complex business process items on the Creatio platform. The guided learning covers creating items that are able to show pages and interact with end user. The participants will learn how to transfer data from the server side to the client side and how to show modal windows over existing pages.

⚠ ATTENTION: preparatory work is required. The participant must successfully complete the following e-learning course before starting their guided learning:

[DEVELOPMENT ON CREATIO PLATFORM](#)
